Bordeaux, November the 28th 2019

**Object: invitation letter to write a scientific article for the 2020 ECCOMAS Newsletter**

Dear Ms Gaburro,

We, the guest editors of the 2020 issue of the ECCOMAS Newsletter ([www.eccomas.org/publications/newsletters/](http://www.eccomas.org/publications/newsletters/)) would like to invite you to produce a scientific article about your latest research findings.

This Newsletter will be distributed during the 14th World congress on Computational Mechanics (WCCM XIV) and 8th European Congress on Computational Methods in Applied Sciences and Engineering (ECCOMAS 2020) to be held in Paris in July 2020 [www.wccm-eccomas2020.org](http://www.wccm-eccomas2020.org).

Your scientific contribution can be a review of your research in a short communication of about 5 pages that will be complemented with news from the community and other communication related to forthcoming conferences and events. This is a great opportunity to be read by the large community of mechanical engineers, applied mathematicians from academy and industry which will attend the conference. We expect about 4500 participants in Paris!

We expect to receive your contribution no later than March the 1st.

On behalf of the editor of the ECCOMAS Newsletter 2020,

Raphaël Loubère
